1. Some symbols in the Burmese script are attached above, below, or beside a consonant. Where such symbols are listed in this table, the symbol “◌” is used to represent the consonant.
2. Absence of a vowel symbol in the script is represented by *a* in romanization, with the following exceptions:
 - (a) when a different vowel is indicated by its appropriate symbol (see Vowels);
 - (b) when the absence of any vowel is indicated by the symbol ◌ (see Final symbols).

Conjunct consonants

Romanize an upper consonant before a lower one:
