SAE International is a globally recognized Standards Development Organization (SDO) that provides technical resources to engineers and professionals in the aerospace, automotive and commercial vehicle industries.

Join the SAE team for a live demonstration of SAE MOBILUS®, our digital library platform. SAE MOBILUS provides access to the most authoritative collection of research content, including engineering technical papers, eBooks, journals, and Edge reports. Areas of research include AI, advanced manufacturing and materials, advanced propulsion, cybersecurity, connectivity, electrification, safety, and automated and unmanned vehicles. For more information, visit: saemobilus.sae.org.

In this webinar, you will:

- Review SAE technical papers, journals, eBooks, and our most popular titles.
- Discover how SAE's technical content can help your teams.
- Learn to navigate the MOBILUS platform, showcasing features such as project folders, annotations, and redlining.
- Explore research content available to our SAE MOBILUS subscribers.

Camila Eskew, SAE Strategic Account Manager, will talk about SAE International's role in mobility and provide a live demonstration to show how to log into their MOBILUS platform and search thousands of publications by topic/author/committee/industry.
